PROFESSIONAL SUMMARY

DevOps engineer with 3+ years in Linux systems, cloud infrastructure, and automation, now deepening expertise in Communications and Signals Processing at TU Ilmenau. Interested in applied roles at the intersection of AI/ML-driven signal analysis, IIoT, and reliable distributed systems where operational experience and signal-level thinking both matter.

EDUCATION

- **Technische Universität Ilmenau** Ilmenau, Germany
Master of Science in Communications and Signals Processing; Oct 2025
- **SRM Easwari Engineering College** Chennai, India
Bachelor of Engineering in Electronics and Communications; Aug. 2017 - July. 2021

SKILLS

- **Programming & Scripting::** Python, Bash, SQL, JavaScript, Go
- **Operating Systems & Systems::** Linux (process management, systemd, chroot), Networking fundamentals, Log analysis, Debugging
- **Signals Processing & Data::** Blind Source Separation, ICA, Statistical Signal Processing, Numerical Simulation (Python)
- **Testing & Automation::** CI/CD (Jenkins), Automated validation scripts, Infrastructure automation (Terraform, Ansible), Monitoring (NewRelic, Prometheus, Grafana, PagerDuty)
- **Cloud & Networking:** AWS (EC2, EKS, RDS), Kubernetes, Istio, Kafka, API Gateways (Apigee)
- **Other Tools:** Git, Fossil, JIRA, Notion, SOC2

EXPERIENCE

- **Smartlead** Sydney (Remote)
DevOps Engineer Feb 2024 - Jul 2025
 - : Designed and automated Linux-based AWS infrastructure supporting high-volume distributed systems with focus on reliability and stability.
 - : Developed Python and Bash scripts for infrastructure automation, unit tests, and reproducible deployments.
 - : Implemented monitoring and alerting systems (Pagerduty, NewRelic) to detect anomalies and improve system observability.
 - : Performed log analysis and root cause debugging of production incidents across distributed services.
 - : Built and optimized CI/CD pipelines (Jenkins) to reduce deployment failures and improve reproducibility.
- **AuditCue** Chennai, India
DevOps Engineer Oct 2023 - Jan 2024
 - : Provisioned AWS environments using Terraform and automated deployment workflows for development and production systems.
 - : Implemented system isolation mechanisms using systemd slices and chroot environments for secure service execution.
 - : Managed secure Linux configurations, VPN-based infrastructure access, and controlled network segmentation.
 - : Built automated backup and validation systems for SQLite databases with structured monitoring.
- **Comcast** Chennai, India
DevOps Engineer Dec 2021 - Oct 2023
 - : Migrated applications to AWS and Kubernetes (EKS) environments, improving deployment stability and scalability.
 - : Enhanced CI/CD pipelines and automated validation steps to improve build reliability.
 - : Developed monitoring dashboards and automated alerting systems for distributed services.
 - : Performed debugging and performance optimization through log-based analysis and systematic issue reproduction.

PROJECTS

- **Blind Source Separation for Mixed Speech Signals - Github:** Developed a machine learning model for blind source separation of mixed speech signals, enabling reliable speaker isolation without prior knowledge of sources.

LANGUAGES

- **English:** C1
